Weekend Report for Tuesday, September 4

U.S. Government Required Disclaimer (Required by the Commodity Futures Trading Commission)
Futures and options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the futures and options markets. Don't trade with money you can't afford to lose. This website and the products, services and other information contained herein is neither a solicitation nor an offer to Buy/Sell futures or options. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed on this website. The past performance of any trading system or methodology is not necessarily indicative of future results.

Trading Involves Risk

Use of any of this information is entirely at your own risk, for which Alexander Trading will not be liable. Neither we nor any third parties provide any warranty or guarantee as to the accuracy, timeliness, performance, completeness or suitability of the information and content found or offered in the material for any particular purpose. You acknowledge that such information and materials may contain inaccuracies or errors and we expressly exclude liability for any such inaccuracies or errors to the fullest extent permitted by law. All information exists for no other than entertainment and general educational purposes.

CFTC RULE 4.41.(b)(1)(i)

Hypothetical or simulated performance results have certain limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, because these trades have not actually been executed, these results may have under- or over-compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated or hypothetical trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to these being shown.

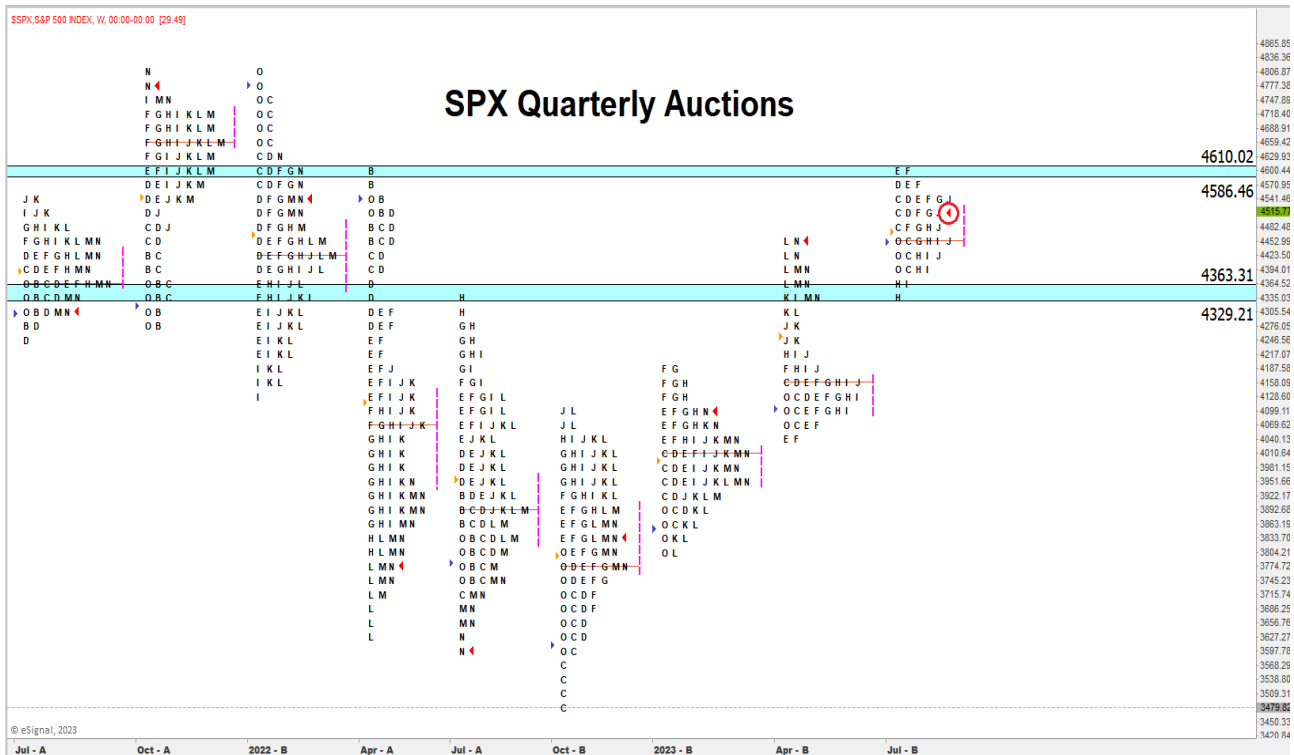

Bottom Line:

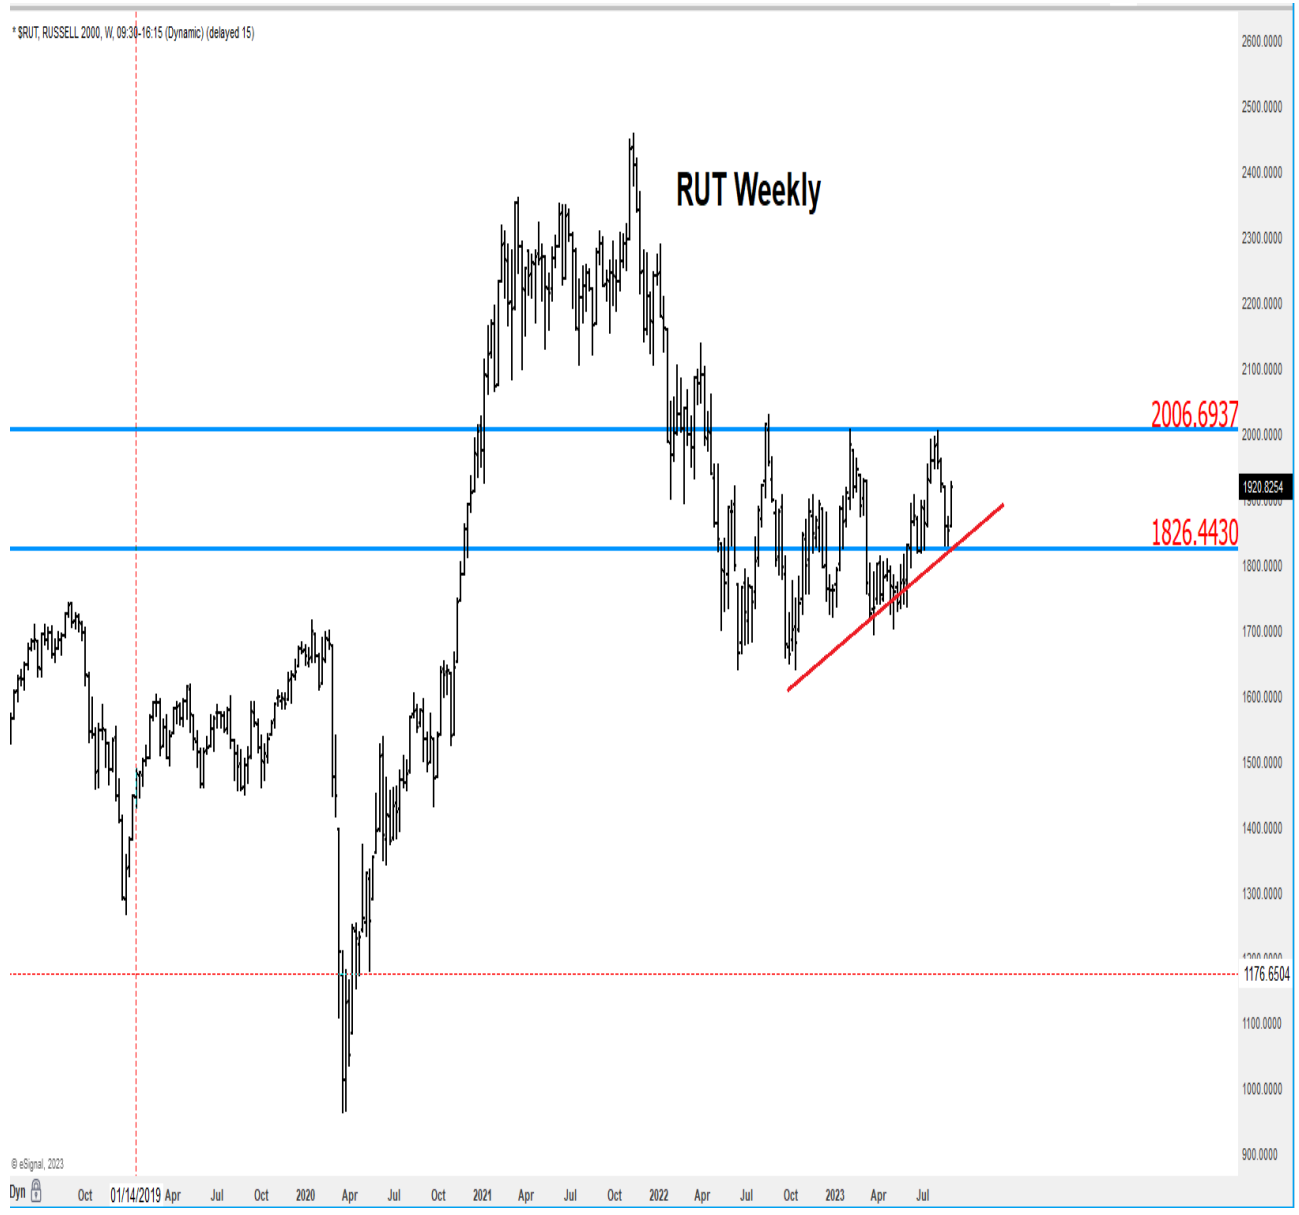

The US equity market continues to absorb any and all news bullishly. All four primary US indices continue to make higher highs and lows in the intermediate term timeframe.

This is the most bearish part of the year from a seasonal perspective, but there has been little “normal” in the indices since last October’s lows.

The SPX third quarter Auction is quite narrow and range extension would not be a surprise.

Internals

NYSE internal data has alleviated its mildly “oversold” condition. Beyond that, there is no big “tell” at the moment.

Please see additional comments in the video.

US 10-yr Notes

Friday's reversal day high is now critical to any bullish assumption.

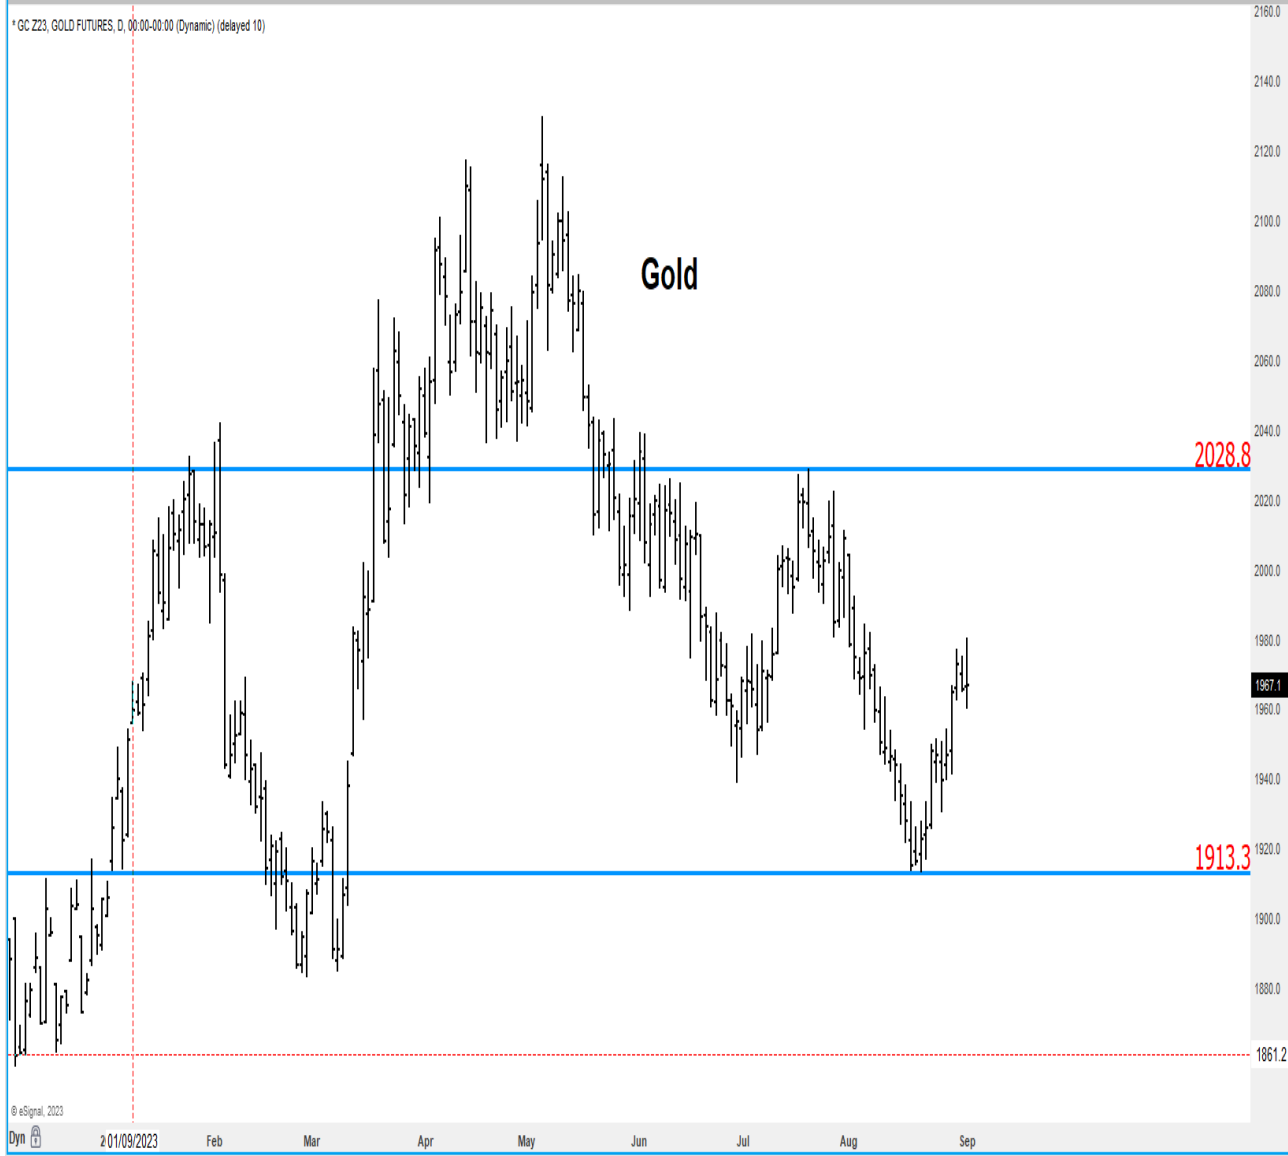

US Dollar

Very well defined upper and lower level at the moment.

Gold

Gold is between critical intermediate to long-term levels.

Crude

Favor longs.
